

## Core Activity Steps (7 minutes)

**Analyze the Logs:** Review the scheduler logs for the "Send Daily Digest" workflow. Identify the recurring red error status and note the "Duration" of the failed jobs.

📸 Refer to Screenshot:

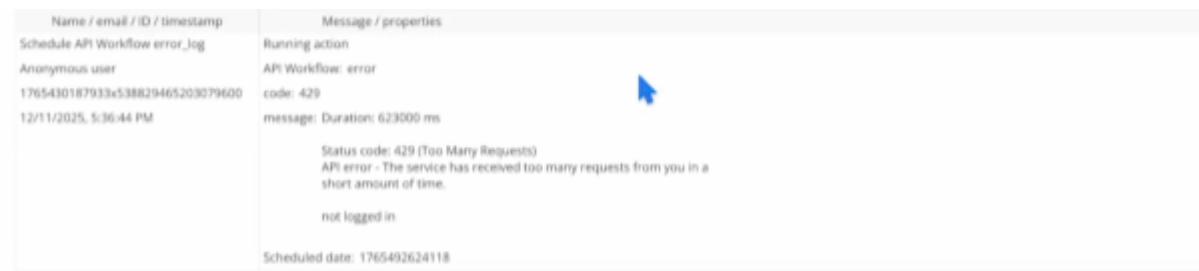

The screenshot shows a browser window with the URL `bubble.io/page?id=optimize_and_evaluate&tab=Logs&name=error_page&type=page&subtab=Server+Logs`. The tab title is "optimize\_and\_evaluate (Built)". The page displays "App Metrics" and "Server logs". A search bar at the top right says "Search past server workflows run in the Main branch". Below it are filters for "Start" (30 minutes ago), "End" (now), "User email", and "Contains". A "Show advanced" button and a "Search" button are also present. The main content area lists log entries. Two entries are highlighted with a red box:

Name / email / ID / timestamp	Message / properties
Schedule API Workflow error_log Anonymous user 1765430187933x538829465203079600 12/11/2025, 5:36:44 PM	Running action: API Workflow: error code: 429 message: Duration: 623000 ms  Status code: 429 (Too Many Requests) API error - The service has received too many requests from you in a short amount of time.  not logged in  Scheduled date: 1765492624118
Schedule API Workflow error_log Anonymous user 1765430187933x538829465203079600 12/11/2025, 5:36:44 PM	Running action: API Workflow: error code: 429 message: Duration: 623000 ms  Status code: 429 (Too Many Requests) API error - The service has received too many requests from you in a short amount of time.  not logged in  Scheduled date: 1765492624598

A cursor points to the second log entry. A link "Zoom on this workflow" is visible at the bottom right of the log list.

**Investigate the Error:** Examine the screenshot of the failed log entry. Review the workflow action details shown to find the specific error message (e.g., "429 Too Many Requests") that reveals the root cause.

📸 Refer to Screenshot: Server Logs – Error Details

This screenshot shows a detailed view of a single log entry from the previous list. The log entry is for a "Schedule API Workflow error\_log" action by an anonymous user. It occurred on 12/11/2025 at 5:36:44 PM. The log details a "429 Too Many Requests" error with a duration of 623000 ms. The error message states: "Status code: 429 (Too Many Requests) API error - The service has received too many requests from you in a short amount of time." The user is noted as "not logged in". The scheduled date for this entry is 1765492624118.

**Identify the Parameter:** Review the screenshot of the Backend Workflows section. Examine the properties shown for the "Schedule API Workflow on a list" action. Identify the specific parameter that is set too high, causing the rate-limit errors.
